E. Tor. and Lomita Win Sewer Fight

(Continued from Page 1) authorizes the construction of an extended outlet at White's Point, two miles west of San Pedro.

San Pedro Plea Leases At the hearing yesterday the San Pedro Chamber of Commerce had a delegation present which protested the application.

He also told President George Ebricht of the board that work would be started immediately to complete the last unit, which includes the bore to be made through the Palos Verdes hills.

Warren's wire said: "The application for districts 1, 2, 3, 5 and 8 was granted today without restrictions as to sewage capacity.

The condemnation suit for a right of way for the metropolitan sewer system across a portion of the city of Los Angeles west of Long Beach has been withheld pending this final hearing before the state board of health on the outfall.

A contract with Long Beach and metropolitan sanitary district No. 3 is ready for signing. Mayor Oscar Haage is the representative of the city on the district's board of directors.

the metropolitan sewage district and the sweeping decision of the State Board of Health, recognized as the last authority, is expected to result in an early date for the election being set.

Fight Incorporation of Alondra Park

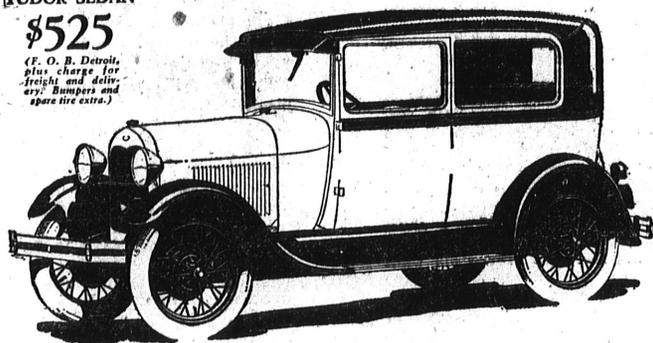

(Continued from Page 1) meeting it is a matter of guess-work as to how the audience stood in regard to incorporating. It was estimated by several people, however, that the sentiment was about evenly divided, judging from the expressions of opinion in the meeting.

It is suggested that the ignition system be protected by a good rubber cover during rainy weather. The parts to be shielded are as follows: distributor head, ignition coil, and generator.

NEW FORD (TUDOR SEDAN

\$525

(F. O. B. Detroit, plus charge for freight and delivery. Bumpers and spare tire extra.)

Real quality has been built into every part of the new Ford

Read over the details of the mechanical features of this new car and you will know there is nothing quite like it anywhere in design, quality and price.

FEATURES OF THE NEW FORD

REMARKABLE ENGINE THE engine of the new Ford embodies many new mechanical features. It gives unusual acceleration, smoothness, speed and power without sacrifice of reliability and economy.

VIBRATION-ABSORBING ENGINE SUPPORT A special feature of the Ford engine is the manner in which engine vibration is absorbed before it reaches the chassis of the car, thereby preventing unpleasant vibration periods.

55 TO 65 MILES AN HOUR The new Ford has unusual speed. It will do 55 to 60 miles an hour with ease. This is a conservative statement. In many road tests it has exceeded 65 miles an hour.

QUICK ACCELERATION Everywhere you go you can see how quickly the new Ford accelerates. Fact is, there are very few cars at any price that are any quicker on the get-away.

LOW UP-KEEP COST The reliability and economy of the new Ford are as important as its beauty, speed, comfort, and safety. Because of the quality that has been built into it, you will save many dollars a year in operation costs and in repair bills.

SILENT SIX-BRAKE SYSTEM One of the first things you will notice when you drive the new Ford is the quick, effective, silent action of its six-brake system.

A further improvement is effected by the self-centering feature of the four-wheel brakes—an exclusive Ford development. Through this construction, the entire surface of the shoe is brought in contact with the drum the instant you press your foot on the brake pedal.

SIMPLE OILING SYSTEM The lubrication system for the engine of the new Ford is as simple in principle as water running down a hill.

As the ends of these rods strike the oil they scoop up a supply for the instant you press your foot on the brake pedal. This prevents screeching and howling and makes the Ford brakes unusually silent.

EASE OF STEERING The new Ford is exceptionally easy to steer because of the well-proportioned weight of the car, the steel-spoke wheels, the co-ordinated design of springs and shock absorbers, the size and shape of the steering wheel, and the simple mechanical construction of the steering gear.

GREASE GUN LUBRICATION The chassis of the new Ford is lubricated by the Alemite high pressure system, the simplest and most effective method of lubrication.

STANDARD EQUIPMENT Standard equipment on all new Ford cars includes four hydraulic shock absorbers, five steel-spoke wheels, electric windshield wiper, speedometer, gasoline gauge on instrument panel, dash light, mirror, combination tail and stop light, oil indicator rod, complete tool equipment, theft-proof, coincidental lock, high pressure grease gun lubrication, and Triplex shatter-proof glass windshield. Wide, substantial rubber floor mats are standard equipment on the new Ford Sport Coupe, Triplex shatter-proof glass windshield springs are provided and standard equipment on the Roadster and Phaeton.

wheel yet there is no danger of the wheel being jerked from the hands of the driver by ruts or bumps in the road. A light touch guides the car, yet you always have that necessary feel-of-the-road so essential to good driving.

TRIPLEX SHATTER-PROOF WINDSHIELD All of the new Ford cars have a Triplex shatter-proof glass windshield. This eliminates the danger of flying glass—the cause of 65% of automobile injuries.

EASY RIDING TRANSVERSE SPRINGS The springs are of the transverse, semi-elliptic type, specially designed and built for the new Ford. They are built of the finest spring steel, and the leaves are wide and thin. Each spring is built up of varying sizes and number of leaves to give proper flexibility and to meet riding requirements of the different body types.

HOUDAILLE SHOCK ABSORBERS Houdaille hydraulic shock absorbers are standard equipment on the new Ford. These combine with the low center of gravity, the minimum unsprung weight, and the easy riding qualities of the transverse springs to make the new Ford one of the most comfortable cars on the road today.

THREE-QUARTER FLOATING REAR AXLE The rear axle of the new Ford is of the three-quarter floating type with spiral bevel gear. The axle housings are made entirely of steel, built up by welding steel forgings to steel tubing. The axle shafts carry none of the weight of the car, the wheels running on roller bearings on the housing. The pinion hub is exceptionally heavy and the pinion is carried on double taper roller bearings, insuring perfect alignment of the gear. Special care has been taken to insure silence in the pinion and ring gears.

STANDARD EQUIPMENT Standard equipment on all new Ford cars includes four hydraulic shock absorbers, five steel-spoke wheels, electric windshield wiper, speedometer, gasoline gauge on instrument panel, dash light, mirror, combination tail and stop light, oil indicator rod, complete tool equipment, theft-proof, coincidental lock, high pressure grease gun lubrication, and Triplex shatter-proof glass windshield. Wide, substantial rubber floor mats are standard equipment on the new Ford Sport Coupe, Triplex shatter-proof glass windshield springs are provided and standard equipment on the Roadster and Phaeton.
